

SUPERION™ is a distinctive safeguarding Wear Layer available exclusively from NextGen Surfaces. This proprietary protection layer, is exclusively trademarked and owned by NextGen Surfaces. It is tailored specifically for flooring products such as SPC and Laminate products. Formulated with a unique blend of minerals and polymers, SUPERION™ provides unparalleled defense against the rigors of daily use, scratches, stains, dents, pet incidents, kitchen spills, bacteria growth, and UV radiation.

Other floorings do not offer SUPERION™ wear layer, or its level or protection. Choose NGS flooring with SUPERION™ wear layer that comes with a superior warranty, and peace of mind.

Don't settle for anything less than the most rigorous protection for your floors. SUPERION™ is made in 12MIL, 22MIL and 32 MIL wear layer and is exclusively available on NextGen Flooring products.

Wear Layer

LET'S GET TECHNICAL

At NGS, we believe in crafting a wear layer that surpass the ordinary. Through our customized approach, we infuse additional charged minerals into the wear layer base, resulting in a bi-directional strength that expertly refracts light. Our innovative process creates a hardened film layer that increases the wear and tear strength by 12%. This proprietary technique is owned and perfected by NextGen. The outcome? A SUPERION™ wear layer that sets new flooring standards in protection and durability.

For whatever your life takes on, SUPERION™ is made to protect your floors.
