

Care and Maintenance of your new NEXTGEN™ SPC flooring.

Product: NEXTGEN™ SPC with SUPERION™ Wear Layer.

The DO's to keep your floors looking new;

- 1.) Dust-mop, broom, and/or vacuum on the correct setting for daily cleaning as required.
- 2.) If needed, occasionally use a damp mop with water only, ensuring the water is well squeezed out. Avoid pouring water or any liquid directly onto the floor or using a mop that's too wet, as this can lead to puddles or excessive moisture on the planks.
- 3.) If there are stubborn residues or gunk that get on the flooring, a mild dish detergent can be used mixed with water and sprayed onto the area. Use a microfiber cloth/mop to dry the area immediately.
- 4.) For any spills, clean and dry the area promptly.
- 5.) If the need arises to deep clean the surface, use a neutral PH cleaner.
- 6.) Liquids and spills must be wiped dry immediately.

Don't expose your floors to the following:

- 1.) Floor polish or floor cleaning wax.
- 2.) Rotating beater bars, scrubbers, jet mops, buffers, etc.
- 3.) Steam mops.
- 4.) The use of harsh or abrasive cleaners that contain ammonia, bleach, oil, polish, strong alkaline agents, solvents, or wax is PROHIBITED.
- 5.) Using chemicals will void your warranty, and may react with floors composition.

Damage prevention for your floors:

- 1.) To prevent deep scratches from heavy foot traffic, area rugs are recommended at the exterior entrance of the location that have access to doorway. This prevents gravel and dirt from entering the larger indoor areas too.
- 2.) Use felt pad protectors on chairs feet and furniture.
- 3.) Replace plastic or metal casters on chairs with rubber wheels and lift instead of sliding heavy objects across the floor.
